

Sahil Vishwakarma

Software Developer | ReactJS | .NET | REST APIs

6260737282 | sahilvishwakarma6260@gmail.com | linkedin

Professional Summary

Full Stack Developer with 3.5 years of experience architecting and delivering scalable enterprise applications using React.js (TypeScript) and .NET. Proven expertise in building modular frontend architectures, designing high performance REST APIs, and optimizing SQL database queries. Adept at translating complex business requirements into robust, maintainable solutions within Agile environments.

Technical Skills

- **Languages & Frameworks:** ReactJS, TypeScript, JavaScript, C#, .NET Core, ASP.NET Core, Entity Framework Core, LINQ
- **Frontend Development:** Reusable Component Design, State Management, Responsive UI Design, Bootstrap
- **Backend & API Development:** RESTful API Design, API Versioning, Global Exception Handling, JWT Authentication, Async/Await, Swagger/Open API
- **Data & Performance:** SQL Server, Query Optimization, Indexing Strategies
- **Tools & Practices:** Git, JIRA, Agile Methodology

Professional Experience

Software Developer at Aloha Technology Pvt. Ltd., Pune, India

Sep 2022– Present

- Architected scalable and reusable frontend components using ReactJS and TypeScript for enterprise applications.
- Delivered and maintained 30+ RESTful APIs supporting internal and client-facing systems.
- Optimized SQL queries and indexing strategies, accelerating API response times and overall system efficiency.
- Integrated Web APIs with frontend applications to ensure seamless data flow and elevate user experience.
- Partnered with cross-functional teams to translate business requirements into production-ready solutions.
- Applied clean architecture principles to enhance modularity, scalability, and long-term maintainability.

Key Projects

Automotive CRM Platform

- Designed ReactJS-based frontend modules to manage dealership leads and customer workflows.
- Implemented 15+ RESTful APIs supporting customer management, sales pipelines, and reporting operations.
- Applied SOLID principles and Dependency Injection to ensure modular, maintainable, and testable backend architecture.

- Fine-tuned database queries to boost system performance and ensure reliable daily operations.

Field Service Suite (FSS)

- Dynamic React dashboards built for scheduling, task assignment, and reporting workflows.
- Engineered backend APIs that enable real-time data synchronization between distributed field teams.
- Reinforced application security by integrating authentication mechanisms and improving overall reliability.
- Performing root cause analysis for timeout issues, data inconsistencies, and workflow defects.
- Collaborating with cross-functional teams (QA, product, DevOps) during releases and hotfix cycles.
- Performing root cause analysis for timeout issues, data inconsistencies, and workflow defects.

Payables Approval & Tracking (PAT)

- Modernized backend services and user-interface workflows for financial processing systems.
- Streamlined database queries and business workflows, minimizing manual processing effort.
- Elevated system usability by aligning frontend enhancements with backend API integrations.
- Writing and optimizing SQL Server stored procedures, queries, and database logic to improve performance and reliability.
- Investigating and resolving production issues across the full stack, including UI, APIs, and database layers.

Key Achievements

- Settled critical workflow defects impacting scheduling processes.
- Identified edge cases in UI and backend integrations to prevent data issues.
- Performed environment comparisons to troubleshoot release-specific problems.
- Improved application responsiveness through database and API optimizations.

Education

- Bachelor of Technology, Information Technology
Gyan Ganga Institute of Technology and Sciences, RGPV University
July 2019– June 2023

Professional Strengths

- Strong debugging and problem-solving skills in complex systems
- Ability to work effectively with legacy codebases and drive incremental improvements
- Focus on code quality, maintainability, and production stability
- Clear communication during technical discussions and reviews

Additional Information

- Comfortable working with legacy codebases while modernizing logic incrementally
- Strong focus on code correctness, maintainability, and system reliability
- Effective communicator in technical discussions, PR reviews, and issue analysis
